Objectives for Today’s Webinar

✓ Describe why building internal infrastructure is key to advancing health equity

✓ Highlight:
  • How New York City is changing internal policies to address racism and structural oppression
  • How Rhode Island is braiding together various sources of funding and mobilizing data to build capacity
  • How National Collaborative for Health Equity is helping health departments prioritize upstream policy change

✓ Showcase the Health Equity Guide as a resource to help your health department advance health equity

Build Internal Infrastructure to Advance Health Equity Webinar  |  healthequityguide.org
HIP – a national non-profit working to transform the policies and places people need to live healthy lives by increasing the consideration of health and equity in decision making

Through research, advocacy, and capacity-building, we bring the power of public health to campaigns and movements for a just society

healthequityguide.org
# About the Health Equity Guide

## Background

- Identified common themes – aka “Strategic Practices” – for how health departments advance health equity
- Articulated a theory of change
- Developed the web resource with 20+ health equity advisors

## What’s on the Website?

- **Strategic Practices & Key Actions** to advance health equity in health departments
- **25+ case studies** that describe how health departments advanced the practice, factors enabling the work, impacts, and advice for others
- **150+ resources** from allied organizations and others

[healthequityguide.org](http://healthequityguide.org)
Inside/Outside Theory of Change

To systematically address power imbalances, racism, and other forms of oppression – the roots of health inequities – health departments must pursue a wall-to-wall transformation.

They must:

– Build internal capacity and a will to act
– Develop relationships with and mobilize communities AND government

healthequityguide.org
Today's Focus

**Strategic Practices to Build Internal Infrastructure**

- Mobilize Data, Research and Evaluation
- Build Organizational Capacity
- Change Internal Practices and Processes
- Prioritize Upstream Policy Change
- Allocate Resources

Build Internal Infrastructure to Advance Health Equity Webinar | healthequityguide.org
Why it was important to build internal infrastructure in NYC DOHMH to advance equity...

- Make agency’s equity priority visible within the organizational structure
- Organize for change – can’t be “business as usual”
- Dedicate staff and resources to develop and implement equity strategies & capacity building
- Build & support leadership for racial equity and social justice across all areas of the agency
- Sustain and share responsibility for equity approaches – “this is all of our work”
**Race to Justice Framework**

*Build DOHMH capacity to advance racial equity and social justice in all that we do*

- Normalize
  - Build Shared Analysis
  - Operate with Urgency

- Visualize

- Operationalize
  - Use Racial Equity Tools
  - Use Data & Metrics

- Organize
  - Internal Infrastructure
  - Partner with Others

*From Center for Social Inclusion (CSI) and Government Alliance on Race and Equity (GARE)*
The impacts of our efforts to advance health equity include...

- Increased capacity and leadership for racial equity and social justice across the agency
  - Over **175 staff** are active members of Race to Justice groups (Core Team, workgroups, action teams, staff facilitators)
  - Division & bureau action teams are having early successes:
    - Early Intervention action team advised program on new PSA to increase outreach in neighborhoods where participation is low
    - Disease Control action team developed equity strategic plan for the division, of which they now help manage implementation
  - **370 staff** trained in Race to Justice Core Workshop
    - Additionally, over **2,000 staff** completed Intro to Health Equity module
    - Over **5,500 staff** completed Gender Identity & Expression Awareness module
One thing health departments could do to build internal infrastructure to advance health equity is...

- Organize and staff an equity team that draws on experiences, perspectives, and expertise from across the department

  Position this team in a way that they have power to develop and advise on equity strategies for the department
Case Study 2: Rhode Island Braids Funding

Deborah Garneau, MA
Co-Director, Health Equity Institute
Rhode Island Department of Health

Build Internal Infrastructure to Advance Health Equity Webinar | healthequityguide.org
THREE LEADING PRIORITIES

1. Address the Social and Environmental Determinants of Health in Rhode Island
2. Eliminate the Disparities of Health in Rhode Island and Promote Health Equity
3. Ensure Access to Quality Health Services for Rhode Islanders, Including Our Vulnerable Populations

FIVE STRATEGIES

1. Promote healthy living for all through all stages of life
2. Ensure access to safe food, water, and healthy environments in all communities
3. Promote a comprehensive health system that a person can navigate, access, and afford
4. Prevent, investigate, control, and eliminate health hazards and emergent threats
5. Analyze and communicate data to improve the public’s health

23 POPULATION HEALTH GOALS

1. Reduce obesity in children, teens, and adults
2. Reduce chronic illnesses, such as diabetes, heart disease, asthma, and cancer
3. Promote the health of mothers and their children
4. Promote senior health to support independent living
5. Promote behavioral health and wellness among all Rhode Islanders*
6. Support Rhode Islanders in ongoing recovery and rehabilitation for all aspects of health*
7. Increase access to safe, affordable, healthy food
8. Increase compliance with health standards in recreational and drinking water supplies
9. Reduce environmental toxic substances, such as tobacco and lead
10. Improve the availability of affordable, healthy housing and safe living conditions*
11. Improve access to care including physical health, oral health, and behavioral health systems
12. Improve healthcare licensing and complaints investigations
13. Expand models of care delivery and healthcare payment focused on improved outcomes*
14. Build a well-trained, culturally-competent, and diverse health system workforce to meet Rhode Island’s needs*
15. Increase patients’ and caregivers’ engagement within care systems*
16. Reduce communicable diseases, such as HIV and Hepatitis C
17. Reduce substance use disorders
18. Improve emergency response and prevention in communities
19. Minimize exposure to traumatic experiences, such as bullying, violence, and neglect*
20. Encourage Health Information Technology adoption among RI healthcare providers as a means for data collection and quality improvement
21. Enhance and develop public health data systems to support public health surveillance and action
22. Develop and implement standards for data collection to improve data reliability and usability
23. Improve health literacy among Rhode Island residents*

*These goals have been proposed through the State Innovation Model and are under review.
Why it was important to **build internal infrastructure** in RIDOH to advance equity...

- To realign investments
- To reduce health disparities
- To address population health
Health Equity Framework - Equity Pyramid

This pyramid is adapted from Thomas Frieden, MD, MPH, Health Impact Pyramid presentation at the Weight of the Nation conference, Washington D.C., July 27, 2009

1. Education & Counseling
   e.g. Eat Right

2. Clinical Interventions
   e.g. diabetes control; pediatric weight management counseling

3. Long Lasting Protective Public Health Interventions
   e.g. immunizations; HIV testing; BMI screening?

4. Changing the Context-Healthy Choices as Default Options
   e.g. smoke free laws; healthy food in schools law

5. Social and Environmental Determinants of Health
   e.g. housing, education, inequalities; community garden

Collaboration, Integration, Partnerships
The impacts of our efforts to advance health equity include...

- Increased resident leadership capacity
- WIC and SNAP redemption at farmer’s market increased by 34%
- Over 3000 youth engaged in healthy eating, physical activity, and empowerment programming
- Built 76 community gardens from vacated and unused lots
- Forged positive relationships among residents and law enforcement
- Community involvement in municipal planning (transit, parks, markets, services)
- Influenced policy (recess law, housing, community policing)
- Leveraged funding
One thing health departments could do to build internal infrastructure to advance health equity is...

Commit to doing the work differently.

Take a health equity lens to each funding opportunity, each application, each initiative, and each evaluation.
Poll # 2: How “advanced” is your department?

Please complete your poll now!

Part A: Where is your health department with respect to building internal infrastructure to advance equity?

1. Infancy
2. Pre-teen
3. Adult
4. Wise elder
5. Not applicable - don’t work in a health department

Part B: Of the following strategic practices to build internal infrastructure, which is the most developed in your department?

1. Mobilize data, research and evaluation
2. Build organizational capacity
3. Change internal practices and processes
4. Prioritize upstream policy change
5. Allocate resources
6. Not applicable - don’t work in a health department
Linda Rae Murray, MD, MPH
National Collaborative for Health Equity (NCHE) Advisor
Former Chief Medical Officer, Cook County IL
Former APHA President

About NCHE

It’s complicated!

ECOSOCIAL THEORY: LEVELS, PATHWAYS & POWER

Levels: societal & ecosystem
- global
- national
- regional
- area or group
- household
- individual

Process: production, exchange, consumption, reproduction

Life Course:
- in utero
- infancy
- childhood
- adulthood
